

International Workshop on

Cosmic Structure and Evolution

September 23 – 25, 2009

Center for Interdisciplinary Research, ZiF,
of the University of Bielefeld, Germany

42

Invited speakers include:

Pierre Astier, IAP Paris
Benedetta Ciardi, MPA Garching
Gary Hinshaw, NASA
Chung-Pei Ma, UC Berkeley
Bob Nichol, Portsmouth
Patrick Peter, IAP Paris
Glenn Starkman, Case Western
Frank Steiner, Ulm
Francesco Sylos Labini, Rome

Organizers: K. Enqvist, Helsinki
A. Natarajan, Bielefeld
P. Peter, IAP Paris
D. Schwarz, Bielefeld

Topics include: large scale inhomogeneity of the distribution of galaxies; large scale structure with the Sloan Digital Sky Survey; IGM reionization and 21cm observations; observing alternatives to inflation; cosmic microwave background and the topology of the Universe;

The workshop is supported by the Center for Interdisciplinary Research (ZiF) and by the International Graduate School, GRK 881, „Quantum Fields and Strongly Interacting Matter“
