

Out-of-Equilibrium Phenomena and Approach to Thermalisation in Heavy Ion Collisions

March 12 – 16, 2007

Laboratoire de Physique Théorique
Université Paris-Sud XI, Orsay, France

Lecturers:

N. Borghini, Bielefeld
A. Dumitru, Frankfurt
F. Gelis, Saclay & CERN
E. Lévesque, Lyon
J.-Y. Ollitrault, Saclay
P. Romatschke, Seattle
A. Shoshi, Bielefeld
R. Snellings, Amsterdam
M. Strickland, Frankfurt

Spring Course of the International Graduate School, GRK 881,
„Quantum Fields and Strongly Interacting Matter“
Paris – Bielefeld

Courses for PhD-students and postdocs

Topics include:

Turbulence in Fluids; Out-of-equilibrium Statistical Physics; Initial Conditions in Heavy-Ion Collisions; Bottom-up Approach to QGP Thermalisation; Instabilities in Non-Abelian Plasmas; Collective Phenomena in Heavy-Ion Collisions

Secretary:

Mireille Calvet
LPT-Orsay, Batiment 210
Université Paris-Sud, F-91405 Orsay
mireille.calvet@th.u-psud.fr

Organizers:

D. Schiff, Orsay
N. Borghini, Bielefeld
